DETAILED ACTION

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 11 and 24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is not clear what is meant by "thin function" since the term is not defined in the specification and the examiner has found no evidence that the term has an accepted meaning in the art. Claims 11 and 24 have not been further treated on the merits.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3747

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 2, 7, 8, 10,12-15, 20, 21, 23, 25, 26, 30, 33 and 37 are rejected under 35 U.S.C. 103(a) as being unpatentable over Williams et al (US 6,394,999 B1) in view of Knopp et al (US 5,865,832). Williams et al discloses a system and method for corrective eye surgery as claimed except for determining an edge feature as a location reference. A first image is obtained as disclosed at column 5, lines 50-66. An orientational change is applied to the corrective procedure as disclosed at column 7, lines 18-67. Knopp et al teaches that it is known to use an edge feature as an eye position locator. See column 17, lines 37-64. It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the system and method for corrective eye surgery of Williams et al so as to determine an edge feature as a location reference, as taught by Knopp et al, in order to provide accurate tracking.

Allowable Subject Matter

Claims 3-6, 9, 16-19, 22, 27-29, 31, 32, 34-36, 38 and 39 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andrew M. Dolinar whose telephone number is (703) 308-1948. The examiner can normally be reached on Mon. - Thu. 7:45 - 6:15.
